 Quito/Ecuador

ABOUT ME

I am a professional in transition, channeling my deep experience in creating 3D visual worlds and interactive effects toward designing intuitive, human-centered user interfaces. My background allows me to understand not only how an interface looks, but how it is built, how it functions technically, and how it feels for the end user. I am eager to contribute this unique combination of visual, technical, and problem-solving skills to a product design team.

PROFESSIONAL EXPERIENCE

Frontend Developer / UI/UX Designer & 3D StickerStoke · Quito, Ecuador (On site) | May 2025 – Present

- Designed and developed a real-time visual customization platform, combining a vector editor with 3D visualization.
- Designed and validated UI/UX interfaces and prototypes through user testing and performance optimization, improving usability and reducing issues reported by clients and internal teams.
- Modeled and optimized 3D models to ensure smooth visualization on web platforms, applying performance principles to the user experience.
- Technologies: AngularJS, TypeScript, UX/UI Design, Prototyping, User Testing.

Freelance UI Designer & 2D Artist Self Employed | December 2024 – May 2025

- Conceptualized and created engaging user interfaces (UI) and iconography for mobile and PC game projects.
- Designed in-game graphics, including logos, buttons, HUD elements, and marketing assets, ensuring visual cohesion and brand alignment.
- Collaborated directly with developers to implement assets, understanding the technical constraints and pipelines of game development.

3D Technical Artist Roarty Digital Inc. · Remote (Canada) | Aug 2024 – Apr 2025

- Created and optimized 3D assets and technical animations for projects in Unreal Engine 5.
- Contributed to the development of interactive experiences, strengthening my understanding of user-environment interaction in complex digital settings.
- Skills: 3D Modeling, Unreal Engine 5, Technical Optimization.

EDUCATION

Universidad de Palermo

Disign Bachellor Degree
2021 - 2022

Instituto Metropolitano de diseño

Multidmedia Design technology
2017- 2020

SKILLS

- UI/UX Design: Prototyping, Wireframing, User Testing
- Frontend Development: React, JavaScript, TypeScript, HTML5, CSS3
- 3D & Visual Design: Unreal Engine 5/4, 3D Graphics Principles, Performance Optimization, Visual Composition Tools: Figma, Adobe Creative Suite (Photoshop, Illustrator)
